

# Wide-reaching, affordable satellite broadband

Get a reliable, high-speed internet connection almost anywhere in South Africa

- > Fast, reliable and wide-reaching internet access
- > No longer a need to worry about fixed line unavailability, cable theft or poor signal strength
- > Cost-effective broadband due to cutting-edge technology
- > Perfect for home and business users
- > Quick to install, with professional installers on standby around the country
- > Unlimited uploads at any time
- > Free Zone offers unlimited downloads during certain times
- > 24/7/365 support

## Product overview

YahClick from Vox Telecom is a cutting-edge, Ka-band, broadband satellite service that delivers reliable, high-speed internet connectivity to users in areas with limited or no internet access, at costs comparable to current terrestrial services. YahClick is available in a range of packages that suit any environment and user segment, right from basic internet access for home users through to high speed service plans for corporate users. YahClick offers unlimited uploads and it's also quick to install, which means that you no longer need to wait weeks for installation or put up with poor signal and cable theft. The need for affordable, reliable connectivity is higher than ever and Vox Telecom's YahClick product will ensure that satellite is a viable option for any South African.

## How it works

Satellite internet access works just like satellite TV (e.g. DStv) and operates according to the same technology; namely, a satellite in orbit that communicates with the mini dish outside your home at lightning fast speeds.

**Perfect for home and business users**

@lantic, a franchise-driven business and a subsidiary of Vox Telecom Limited, is a leading telecoms operator that provides voice, data and web services to consumers and SMEs.

## New technology

YahClick technology is based on something called Ka multi-spot beams, which is a major differentiator to traditional satellite technology. While satellite internet isn't a new technology, cutting-edge "frequency reuse" maximises spectrum efficiency and means that YahClick is perfect consumer and business broadband needs. Here's why:

- Ka-band makes use of "spot beams" rather than broadcasting over an entire continent, which results in far more efficient use of the available bandwidth and a lower cost to you
- Ka-band doesn't require a very large dish outside your home or office to produce high speed internet in either direction (high speed downloads and uploads)

- YahClick is specifically designed around Ka-band technology and acceleration or frequency reuse techniques have been implemented to ensure high-speed performance

**With YahClick you'll  
be up and running  
in a few days –  
wherever you are!**

## YahClick Go

YahClick Go is a mobile satellite package that offers instant internet connectivity wherever your vehicle is parked. YahClick Go's, which is easily mountable on any SUV or trailer, offers access via an auto-pointing antenna and can be operated by a single person. It's the ideal alternative to existing technologies (which often don't meet demand or can't match connection speeds with uplink and downlink requirements) and is perfectly suited to businesses that are on the go and travel large distances (within the same country or across borders) and need instant connectivity at their destinations. It's great for:

- Media broadcasting
- Military deployments, United Nations and NGO operations
- Emergency and disaster management units, fire and rescue, special operations and security companies
- Government departments such as Home Affairs and the SAPS
- Mining and exploration
- NGOs that require connectivity in remote locations
- Events companies and mobile marketing vehicles and mobile offices
- Financial institutions and ATMs
- Mobile education

## Consumer packages

All consumer packages includes VAT:

Service plans	Download speed (Kbps)	Upload speed (Kbps)	Monthly allowance	Price p/m *^#
Value 512	512	128	1.5 GB	R 186.00
Home 512	512	128	3 GB	R 277.00
Home 1 Mbps	1,024	256	6 GB	R 502.00
Home 2 Mbps	2,048	512	7,5 GB	R 763.00
Home 5 Mbps	5,120	768	15 GB	R 1,204.00
Home 7 Mbps	7,168	768	15 GB	R 1,438.00
Home 10 Mbps	10,240	768	18 GB	R 1,663.00

Excludes: \* Standard installation costs from R 1,197.00 once-off  
 ^ Equipment (dish, transmitter and modem) prices from R 262.00 monthly or R 6553.00 once-off  
 # Connection fee of R 171.00

## Business packages

All business packages includes VAT:

Service plans	Download speed (Kbps)	Upload speed (Kbps)	Monthly allowance	Price p/m *^#
Business 1024	1,024	256	10 GB	R 1,596.00
Business 2048	2,048	512	15 GB	R 3,333.00
Business 3072	3,072	1,024	21 GB	R 5,585.00
Business 5120	5,120	1,536	30 GB	R 9,505.00
Business 10240	7,168	3,072	36 GB	R 11,144.00
Business 15360	10,240	3,072	50 GB	R 14,870.00

Excludes: \* Standard installation costs from R 1,197.00 once-off  
 ^ Equipment (dish, transmitter and modem) prices from R 262.00 monthly or R 6553.00 once-off  
 # Connection fee of R 171.00

## Enterprise packages

All enterprise packages includes VAT:

Service plans	Download speed (Kbps)	Upload speed (Kbps)	Daily allowance	Price p/m *^#
Mega 3 Mbps	3,072	1,024	1,500 MB	R 10,875.00
Uplink Mini 512 Kbps	256	512	50 MB down, unlimited upload	R 747.00
Uplink Master 3 Mbps	1,024	3,072	1,000 MB down, unlimited upload	R 6,635.00
Insure 2 Mbps	2,048	512	50 MB	R 1,228.00
Insure 5 Mbps	5,120	1,536	50 MB	R 2,470.00
Insure 15 Mbps	15,360	1,536	100 MB	R 4,288.00

Excludes: \* Standard installation costs from R 1,197.00 once-off  
 ^ Equipment (dish, transmitter and modem) prices from R 262.00 monthly or R 6553.00 once-off  
 # Connection fee of R 171.00
